Employee Commuting

Employee Commuting

This category will award those organizations that have a lower than average rate of single-occupancy car commutes. At present, 73% of Dane County residents drive alone to work.

Here we care about usual practices - what folks do most of the time. We're interested in the 2021 time frame - what most people did most of the time in 2021.

Typically entities gather this information from an annual survey of employees. Of course 2021, with the pandemic was different. If most of your employees worked from home most of 2021 you could qualify as a Climate Champion in this category.
