

# RenewAire

## Project Details

## Energy Efficiency

- Location: 201 Raemisch Rd. Waunakee, WI 53597
- Environmental Certification: LEED Gold, Green Globes, two Energy Star awards
- Size: 111,489 sq ft
- Project Type: Commercial Office, Industrial

- Powered completely by wind-generated electricity
- LED lights provide most indoor lighting
- Super insulated roof
- HVAC system driven by RenewAire ERVs at its core

RenewAire has been producing sustainable energy recovery ventilation (ERVs) systems for 35 years. In 2017, the company renovated a vacant building in Waunakee into a new, more energy efficient manufacturing facility. The building excels in efficiency, using 50% less energy than comparable facilities.

## Waste and Material Management

- Recycled 95% of construction waste
- Utilized low-emitting building materials in construction
- Reduced building water use by 40%
- Uses 100% recycled paper for printing

## A Pioneer in Its Class

RenewAire is one of the few manufacturers *in the world* to have received LEED Gold certification and two Energy Star awards. Its dedication to providing clean, sustainable air quality maintenance systems while limiting environmental impact is inspirational.

This document was made with 350 Wisconsin's Community Climate Solutions Team to promote green buildings in the surrounding community.
